Fixtures shown in silver w/frosted lens

## Features

- ETL certified fixtures conform to UL Std 2108 and NEC requirements.
- Color Rendering Index (CRI) of 95 or above. Brings out true colors
- Fixtures require a separate LED driver and are dimmable when powered with an approved dimmable driver.
- Custom fabricated in the USA in lengths from 4-inches up to 16 feet.
- Miniature hardwired fixtures are easily hidden under or inside cabinets, and do not require special cables or connectors.
- 5/8" deep housing minimizes LED imaging on the lens.
- 2-year warranty when powered with a Northwest LED approved driver. Ask for details.

## Diffuser Lens Options

### Standard Lenses

Frosted (f) - produces a softer, slightly warmer diffused light and is preferred with reflective surfaces to minimize glare and reflection.

Prismatic (p) - produces a brighter, slightly whiter light and is preferred where maximum light output is desired and the fixture is hidden from normal view.

### Specialty Lenses (select models only)

Focus Lens (x) - allows the light to be "focused" into a narrow 30 degree beam for wall wash effects.

Opal (o) - heavily frosted for maximum light diffusion (reduces light output).

## Ordering Information

All SINGLE series fixtures come standard with "Silver" finish, a single 2 foot long lead and 3M foam mounting tape. Please specify the housing style, color temperature, brightness level, and finished length for each fixture. Fixtures may *optionally* be ordered with extra long leads, leads on both ends, interconnected with a short "jumper" to allow fixtures to be mounted around corners or with mounting clips. Finish options other than silver generally require additional lead time. Please call for availability and pricing.
